Bachelor of Technology

Computer Science and Engineering

Projects

E-Kavach – Wearable Safety & Tracking System
IoT | GPS | Wearable Technology

- Conceptualized a wearable safety-tracking system designed for women and children.
- Designed the proposed system architecture for real-time location tracking and emergency alerts.
- Researched the integration of GPS, wireless communication, wearable hardware, and mobile application for safety monitoring.
- Currently in the concept and design stage, with prototype development planned.
